

Our High Performance blocks size 45, 57, 75 and 100 are now also available with plan bearing sheaves instead of the standard aluminium ball bearing sheaves. The design is the same as known from our existing High Performance Series - the only difference is the sheave.

Furthermore, we have introduced size 35 - a new size in the High Performance Series. Size 35 is also available with aluminium ball bearing sheaves - please see page 5 in our High Performance catalogue.

The blocks are supplied in standard polishing or high polished stainless steel.
