

OH Fairlead thimbles (round)

OH Marine Equipment has made a new product: OH fairlead thimbles (round). The thimbles can be spliced into control lines and are used to deflect sheets and control lines or for lashings.

They are designed to replace blocks in applications where the line passing through the centre is not constantly moving and can for example be used for backstay or barber haulers.

OH Fairlead thimbles are available in 6 different sizes in black and they are made of high strength aluminium alloy and are HC/hard-anodised.
